

Assignment 1

1. Visit the NSE and find the Current "Top 10 Constituents by Weight". Create a Pie Chart in Python using matplotlib. Repeat the above exercise for past 10 years.
2. Use yfinance to download closing prices for the last 10 year for Gold and Crude Oil. Normalize the data and plot both on the same chart to check for correlation.
3. Based on your research in Question 7 in Reading Assignment 2, create a Python Dictionary with 5 major sectors (e.g., Financial Services, IT, Oil & Gas, FMCG, Auto) and their approximate Total Market Cap in Crores on yearly basis. Plot a Donut Chart or Pie Chart to show the Market Cap distribution. Repeat the analysis for previous past 10 years.
